## **Software Engineer**

As a passionate and creative software engineer, I am looking to apply strong attention to detail, and problem solving skills, where I can collaborate with others to create innovative solutions and learn by doing in a fast-paced environment.

## **Skills**

JavaScript, TypeScript, React, Python, Django, HTML5, CSS, NodeJS, ExpressJS, Redux, jQuery, NextJS, React Bricks, SQL, MongoDB, Firebase, PostgreSQL, Heroku, Git, JSON

## **Education**

**Certificate, Full-Stack Web Development Bootcamp**, University of California, Berkeley

**Certificate, Django 2.2 & Python**, Udemy

**B. S. of Nutritional Science, Sports Nutrition**, San Jose State University

## **Professional Experience**

**Software Engineer** Intern, Jetsweat

2023 – Present

**Stack: *React.js, Sagas, Sails.js, MySQL, EJS, Skeema, AWS, JavaScript***

- Spearheaded the development and deployment, with the assistance of senior software engineers, of a feature that added classes to a user's in-platform calendar immediately after purchase, resulting in a significant improvement in usability, and efficiency.
- Implemented "Powered by Stripe" badge on checkout page resulting in a significant reduction in cart abandonment and a substantial increase in conversions, demonstrating the trust and security that Stripe provides to customers during payment processing.
- Collaborating with the CEO and senior software engineers in physical therapy product discovery, providing valuable insights and recommendations for design decisions, and leveraging my expertise to inform the development of a world-class physical therapy product offering that will revolutionize the industry.

**Physical Therapy Aide**, Agile Physical Therapy

2019 – Present

- Developed a web app that revolutionized training for staff, increasing productivity and accessibility.
- Accelerated onboarding for PT aides by 66% through innovative updates to training materials.
- Exhibited exceptional leadership skills in guiding and supporting the training of new hires.

## **Projects**

**AIDEucate** ([aideucate.netlify.app](#))

**Stack:** React, Tailwind CSS, Syncfusion, JavaScript

- A web app that consolidates training modules used to reduce training new PT aides at Agile PT by 66%
- Integrated syncfusion's API with a full-featured scheduler component to enable lead aides in creating & editing onboarding schedules.
- Utilized Tailwind CSS to design minimalistic yet modern user interface, improving user experience

**Movie Dashboard** ([blooming-stream-54961.herokuapp.com](#)) **Stack:** MongoDB, Express.js, React, Node.js

- Collaborated with a team of 3 to implement GraphQL with Node.js and Express.js to create a secure, seamless backend for a movie search engine, enabling users to register accounts & save favorite movies
- Designed UI using React and Bootstrap CSS that provided intuitive user experience and integrated OMDb REST API into MERN stack architecture.
